ward was made over multiple years

Project Description	Status
This project includes approximately 18,400 square feet in additional new construction of an indoor swimming pool, child	
care nursery, fitness center, multipurpose room and conference meeting room. The project also includes renovations of	
about 2,700 square feet that will add or expand the weight room, family and special needs changing rooms and second	
floor restrooms. This award was made through the CAT Program administered by the Department of Economic	
Development	under construction
This project will offer a state-of-the-art arena with seating for 350 people; additional bleacher seating and announcers box	
for hosting contests, rodeos, clinics and expositions. The Equine Center will also offer boarding stalls, large animal labs,	
washroom, tack room, changing area, vending area, and restrooms. This award was made through the CAT Program	
administered by the Department of Economic Development	under construction
This project includes the construction of a 40,000-square foot wellness center that will include a gym, a lap pool, a zero	
depth entry pool, racquetball courts, a fitness studio, a cardiovascular area, a weight room, a kid zone, and	
meeting/classroom space. This award was made through the CAT Program administered by the Department of Economic	
Development	under construction
This project will include the construction of an approximately 22,000-square foot building with a large gymnasium, elevated	
walking/running track, multi-purpose activity room, fitness/weights area, locker rooms, veterans' area and offices.	
Partnerships for this project include the Veterans of Foreign Wars and American Legion, who will provide displays and	
utilize the meeting space. This award was made through the CAT Program administered by the Department of Economic	
Development	under construction
This project will consist of the enhancement and restoration of the Grand Avenue boulevards from 8th Street to 18th Street	
as well as the enhancement of the Grand Avenue Bridge with art deco style improvements as follows: a) Grand Avenue	
Boulevard Enhancements will create prominent and unique entrance pillars which will announce to travelers they are	
entering the Grand Avenue neighborhood. The entrance pillars will be placed at 17th Street and at 9th Street. The first	
three blocks of boulevards from both ends will be intensely landscaped. The middle four boulevards will also be renovated	
and landscaped, but more modestly; and, b) Grand Avenue Bridge Enhancements will take place on the U.S. Highway	
18/71 bridge immediately south of downtown Spencer. The improvements will elaborate on the art deco theme by creating	
pedestrian plazas and monuments on each of the four bridge corners. Specific improvements to each plaza include seat	
walls, planters, lighting, and art deco monuments with artwork by Dave Dahlquist. This award was made through the CAT	under construction
Located on City Island, this project includes the construction of a 35,000 square foot community ice center with seating	
capacity of over 1,000. The facility will include a community room capable of hosting audiences of 100 people, a dedicated	
hockey and ice-skating pro shop, six locker rooms, and a concession stand and more. In addition, the facility will be	
designed to augment future expansion as demand grows. The plan enables the addition of a second indoor ice rink and	design completed;
potential for a third outdoor rink. This award was made through the CAT Program administered by the Department of	some construction
Economic Development	started

This project includes the construction of 25 miles of rail to trail conversion. The trail will start in Ankeny and run 25 miles in a north-northwestern direction to Woodward. The trail will incorporate Polk, Story, Boone and Dallas Counties and the cities	
of Ankeny, Madrid, Sheldahl, Slater and Woodward. The bridge over the Des Moines River will include six cantilevered overlooks and LED lights. This award was made through the CAT Program administered by the Department of Economic	
Development	under construction
This project includes the construction of the 20,000-square foot Wilton Public Library and Community Center. This facility	
will be built on land donated by the City of Wilton at the intersection of Cypress and Division Streets. This award was made through the CAT Program administered by the Department of Economic Development	under construction
This project is the renovation and adaptive reuse of the former City of Des Moines Public Library building into the Norman E. Borlaug Hall of Laureates. Renovations will take place on all four floors of the building. The garden level will feature the	
Hall of Laureates' educational exhibits and interactive learning materials. Kitchen facilities will be added here to provide catering to groups and events. In addition, the WPA murals will be cleaned and preserved. The major renovation of the	
main floor will include the removal of the two-level stacks area and relocation of six structural columns within the south	
wing, essentially leaving blank space. This area will be utilized as ballroom and meeting space. The north wing of this level will include a large conference facility and meeting room, as well as additional smaller meeting rooms and areas to	some design
display artwork. The mezzanine level of the building will be opened up to reestablish its original footprint. The south wing will be a large ballroom with other rooms highlighting the life and work of Dr. Borlaug, the Laureates and Iowa's heroes.	completed; construction not started
The proposed project will transform 65,000 square feet of a former department store building in downtown Sioux City into the new facility for the Sioux City Public Museum. The project will include construction of new exhibition spaces, children's	
areas, public meeting rooms, a research center, a museum store, outdoor green space and visitor-friendly "museum	
plaza", and non-public areas such as, office space and collections storage. This project will move the museum from its current home to the expanded facility. This award was made through the CAT Program administered by the Department of	
Economic Development	not started
This project includes a two story addition to the community's existing recreation center. The proposal includes an indoor swimming pool, racquetball court, community center, and classroom space for pre-school and child care services. This	
award was made through the CAT Program administered by the Department of Economic Development	under construction
This project includes two major components. The first component will consist of building envelope improvements to the	
Machine/Blacksmith Shop. These improvements will include: tuck pointing interior and exterior masonry; removal of wood rot and the construction, fabrication and installation of new wood windows, doors, and roof structures, and the purchase	
and installation of new HVAC mechanical and electrical systems. The second component will include the design and construction of new Railroad Civil Engineering Exhibit Building. The 80' x 50' structure will be either a wood frame or pre-	
engineered metal building, pending the approval from the State Historical Society of Iowa Preservation Officer. Additional construction work will include the installation of plumbing, HVAC mechanical systems, and electrical systems. This award	
was made through the CAT Program administered by the Department of Economic Development	

This project includes the construction of 25.5 miles of trail spanning two counties and three communities. Fourteen miles	
of asphalting will be applied to an existing railroad bed with lime screening surface. Approximately 11.5 miles of trail will be	
new construction, requiring engineering, land acquisition, clearing and grubbing, grading, shouldering, seeding and	
asphalting. This project will also include the construction of four bridges, three new walking bridges and one	
vehicle/walking bridge. In addition, this project will include street and parking infrastructure. County gravel road A46 will be	
hard surfaced with pedestrian lanes placed on either side. And, a 30' x 100' asphalt parking area will be created on Mitchell	
County Conservation Board property to be developed as part of a trail head. This site will also include picnic tables, an art	
sculpture, informational signage and a porta-potty. Improvements within the City of Riceville will include the property	
	under construction
Specific project components include: replacement of inefficient boilers and chillers; expanded vault storage and handling	
areas; improved security for the outdoor sculpture collection; roof replacement; new lighting; replacement of many windows	
and sun screening materials; an additional 7,500 square foot shipping/receiving and storage space and improved	
accessibility with the addition of an elevator, new entry ramp and renovated accessible restrooms. This award was made	
through the CAT Program administered by the Department of Economic Development	under construction
This project includes the construction of a new aquatic center facility, which will include eight 25-meter lap lanes, a speed	
slide, a tube slide, a family slide, zero-depth entry with various play features, a water walk, concessions, a lazy river, a new	
bath house, shade structures, and new playground equipment. This award was made through the CAT Program	
	under construction
This project includes the construction of a new aquatic center facility to replace the outdated existing facility. Specifically,	
the project will include a 5,282-square foot swimming pool with zero-depth entry, water spray units, toddler slide, play	
structure, lap lanes, tube slide, body slide, diving board, concession stand, and bath house. This award was made	
through the CAT Program administered by the Department of Economic Development	construction started
This project will include the construction of a new 4,500 square foot exhibit area to tell the eighty-five year history of the	
Sidney Rodeo. Demolition of the existing building is included along with constructing a basement for storage. In addition, a	
connection between the Gathering Place and the Rodeo Museum will be constructed and will contain public restrooms.	design completed; no
This award was made through the CAT Program administered by the Department of Economic Development	construction started
This project includes the construction of a 400 seat performing arts center that will be directly connected to the Galva	
Holstein High School building. The facility will have two levels totaling approximately 12,000 square feet. Within the facility	
there will be dressing rooms with multiple make up stations, rest rooms with a shower, a green room, prop and storage	
areas, and meeting and potential classroom space. This award was made through the CAT Program administered by the	
Department of Economic Development	under construction
This project includes the construction of a 5 600 equare feet museum in Clarinda, lower to be not the highest of Clare	
This project includes the construction of a 5,600 square foot museum in Clarinda, lowa to honor the birthplace of Glenn	
Miller. This facility will have display space for rotating exhibits about Glenn Miller and the Big Band era. There will also be	
a theater area that can be used for presentations as well as for small functions. Also, the Society's offices, library, gift	
shop, and large public restrooms will be located in the building so that year round staff presence can be maintained at the	
site. This award was made through the CAT Program administered by the Department of Economic Development	under construction

to the Raccoon River Valley Trail as a multiuse recreational hard surface trail that will include sections in Dallas, Guthrie and Greene Counties. The project will also include the rehabilitation of the section of existing trail from Panora to Yale. This award was made through the CAT Program administered by the Department of Economic Development This project includes the renovation. Six major components of the renovation and addition include: the addition of a new lobby and entrance terrace on the west side of the building; the roof over the theatre will be raised by four feet to accommodate stage lighting and scenery; an improved and expanded HVAC system; the stage will be expanded to provide for more wing space; the seating will be reconfigured for better sight lines for audience members, and the new addition will include new set construction shop, new dressing rooms and green room, new Library/Museum to be used for meetings, classes and rehearsals, and larger, handicapped accessible restrooms. This award was made through the CAT Program administered by the Department of Economic Development This project includes the construction of a new public library on land purchased by the city located on the northwest corner of the downtown square. The completed facility will be approximately 12,000 square feet on the main level. This award was made through the CAT Program administered by the Department of Economic Development This project includes the major expansion and renovation of the lowa Theatre Building. On the main floor, the renovation focuses mainly on improving the patron experience. A new digital marque will greet visitors and alert passers-by of the many events being held at the theatre. The main vestibule will connect directly to the box office, which previously had been located in tenant space along 3rd Street. Down the hall from the box office will be the relocated library, named in honor of the late Fed Hedges. The location of the library to a storefront space will make the space much more visible		
and Greene Counties. The project will also include the rehabilitation of the section of existing trail from Panora to Yale. This award was made through the CAT Program administered by the Department of Economic Development This project includes the renovation of the existing 9,598-square foot Spencer Community Theatre, as well as the construction of a 7,437-square foot addition. Six major components of the renovation and addition include: the addition of a new lobby and entrance terrace on the west side of the building; the roof over the theatre will be reasized by four feet to accommodate stage lighting and scenery; an improved and expanded HVAC system; the stage will be expanded to provide for more wing space; the seating will be reconfigured for better sight lines for audience members; and the new addition will include new set construction shop, new dressing rooms and green room, new Library/Museum to be used for meetings, classes and rehearsals, and larger, handicapped accessible restrooms. This award was made through the CAT Program administered by the Department of Economic Development This project includes the construction of a new public library on land purchased by the city located on the northwest corner of the downtown square. The completed facility will be approximately 12,000 square feet on the main level. This award was made through the CAT Program administered by the Department of Economic Development This project includes the major expansion and renovation of the lowar Theatre Building. On the main floor, the renovation not started This project includes the major expansion and renovation of the lowar Theatre Building. This award was made through the CAT Program administered by the Department of Economic Development This project includes the major expansion and renovation of the lowa Theatre Building. On the main floor, the renovation focuses mainly on improving the patron experience. A new digital marquee will greet visitors and alert passers-by of the many events being held at the theatre. The main vestibule will connect directly to the box office, which previously had beer located in tenant space along 3rd Street. Down the hall from the box office will be the relocated library, named in honor of the late Fed Hedges. The location of the library to a storefront space will make the space much more visible to the public and encourage greater use of its resources. The major change to the layout of the building will be the expanded lobby. By relocating the offices to the second floor, the lobby will nearly double in size. This will also allow for larger, code-compliant restrooms. Along 1st Avenue, two storefront tenant space will be captured b		under construction
a new lobby and entrance terrace on the west side of the building; the roof over the theatre will be raised by four feet to accommodate stage lighting and scenery; an improved and expanded HVAC system; the stage will be expanded to provide for more wing space; the seating will be reconfigured for better sight lines for audience members; and the new addition will include new set construction shop, new dressing rooms and green room, new Library/Museum to be used for meetings, classes and rehearsals, and larger, handicapped accessible restrooms. This award was made through the CAT Program administered by the Department of Economic Development This project includes the construction of a new public library on land purchased by the city located on the northwest corner of the downtown square. The completed facility will be approximately 12,000 square feet on the main level. This award was made through the CAT Program administered by the Department of Economic Development This project includes the major expansion and renovation of the lowa Theatre Building. On the main floor, the renovation of the late Fed Hedges. The location of the library to a storefront space will be the relocated library, named in honor of the late Fed Hedges. 	reading room, a computer area, two restrooms, a large circulation desk area, a 1,534 square foot walk-out basement, a	
	children's reading area, a program room with a capacity of 30 people, and a larger area to hold library materials.	project has not started

This project includes the construction of a 4,500 square foot environmental education center, located at Hillview Recreation	
Area, in Hinton. The project will include a facility with a large classroom and kitchenette, a display area and lobby, an	
observation deck, public restrooms, offices and storage space. Specific sustainability practices that will be used in the	
project will include orientation of the facility to passive solar heat gain, low volatile organic compound (VOC) paints,	
ecologically friendly carpet, and permeable parking surfaces.	project has not started
This project includes the expansion of the existing library building from 2,480 to 4,820 square feet. This project will also	
involve the rehabilitation of the existing building to make it contiguous with the new addition.	project has not started
This project includes the transformation of eleven and a half acres of the impaired Mud Creek watershed into a viable	
wetland ecosystem, creating an outdoor nature and discovery center showcasing natural resources enhancement and	
natural aquatic filtration techniques to improve water quality. In addition, a multi-purpose hard surface trail will wind through	1
the park.	project has not started
This project includes two components. The first, Mark's Park, will be a 4,200 square foot family friendly park with play	
equipment and splash features overlooking the Cedar River. The second, the performance structure, will turn a planned	
15,000 square foot Amphitheatre into a true stage for concerts, shows, and exhibitions by providing a stage structure,	
lighting and backdrop. The Amphitheatre itself was included in a previous Vision Iowa award, the River Renaissance	
project, and is not included in this project.	project has not started
This project includes the construction of the Mississippi Plaza located between the National Mississippi River Museum and	
Aquarium and the Great Rivers Center. The plaza will include a living stream, which is an outdoor aquarium where buffalo	
fish, carp, and other species swim in a recreated river on the plaza. The plaza will also include two fish feeding stations,	
the Huck Finn raft ride, pedestrian bridges, the Boat Pavilion, the Events Pavilion, the Bioswale Rain Garden, the	
interactive Dancing Waters Fountain, a Catfish sculpture, and Reflections Garden. In addition, the city will develop a	
marina designated for overnight large boat use. The marina will include tie up facilities for 56 slips, navigational aids,	
concierge services, a dockside shower/restroom facility, and laundry facilities.	project has not started
